

Diabetes Parent Agreement

Mitchell Road Christian Academy will provide care to students with diabetes in collaboration from their physician and parents/legal guardian according to their current Diabetes Medical Management Plan. The DDMP needs to be filled out by their physician and signed by their physician, parent/legal guardian, and nurse prior to the start of each school year. Any changes to the DMMP needs to be in writing from the physician.

At parents/legal guardian approval, the nurse will be given access by the parent/legal guardian to follow the student's Continuous Glucose Monitoring in order for notifications to be set for high and low CGM readings.

CGM readings may be used as baseline reading before and after recess and PE.

Blood Glucose must be used to verify low or high reading prior to treatment and before lunch.

Parents/legal guardians will provide snacks and diabetes supplies to be used at school.

Carbohydrate Count will be provided for snacks and lunch each day by parent/legal guardian. If additional food is consumed for a party or class treat and parent/legal guardian is not available the Calorie King app will be used to verify carbohydrate count.

Parent/legal guardian or designated chaperone by parent/legal guardian must attend any field trip with their child including bus ride unless student has permission from their physician and parent/legal guardian to self-administer their diabetes care.

I _____, Parent/legal guardian of _____, have read and agree and abide by Mitchell Road Christian Academy's Diabetes Policy.
